

Temporary Power Application (commercial use only)

Owner: _____ Permit Number: _____

Job Location: _____

Purpose: _____ Portion of Building: _____ # of Days: _____

Electrical Contractor's Approval

I, _____ (Electrical Contractor) of _____ (Company name) hereby grant approval for installation of the temporary power electric circuits as requested by the responsible agent above. I agree to install these circuits, as requested, as per the provisions stated in this application and the amendments to North Carolina Electrical Code, Article 10.8 Temporary Wiring. The following requirements shall be met:

1. The service wiring and equipment shall be installed, wires terminated, and covers installed.
2. Portion of the electrical system to be energized shall be complete and approved by code official.
3. Grounding electrode system shall be complete.
4. The grounding and the grounded conductors shall be terminated in the service equipment.
5. One GFCI receptacle for personnel shall be installed with the circuit wiring terminated.

General Contractor's Approval

I, _____ (General Contractor), of _____ (Company name) as the responsible agent supervising construction activities apply for permission to utilize a portion of the building's permanent wiring system for temporary power solely for the purpose(s) as stated above. I, by this declaration signed, do hereby promise, covenant, and agree as follows:

That this application is specifically limited to energizing partial portions of the electrical system for the intended use and duration of time as stated above.

That my qualification as responsible agent and the necessity for temporary power shall be at the sole discretion of the County Building Permitting and Enforcement Department, and shall not be granted solely for convenience.

That I as the responsible agent and applicant for temporary power, shall neither hold the County of Transylvania, State of North Carolina, nor its governing officials, per County Code Enforcement Officials, responsible for any damages or injuries to any persons or property which occurs or may occur from my failure to safely maintain the energized electrical system or that portion of the building containing the system in a secured and locked manner or under constant supervision to exclude unauthorized personnel, or from our failure to alert personnel working in the vicinity of the energized electrical system to its presence, or as a result of any electric power connection or disconnection of the temporary power by the electric utility company or others.
